

The Optical Engineering Experts®

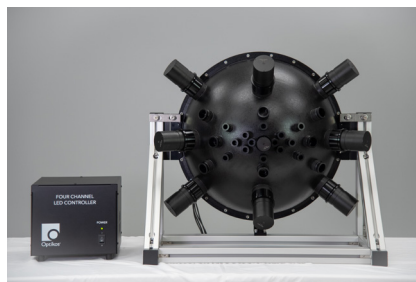

# Meridian® Product Family: Configurable and Compact Camera Testing Solutions

The members of the Meridian family have this in common: they can generate fields of virtual objects in a compact space, eliminating the need to place enormous test targets at a large distance. Meridian projectors can be paired with a variety of system platforms to provide image quality and stray light measurements for engineering labs or production environments.

## TARGET PROJECTORS AND PLATFORMS

Optikos offers an array of target projectors that can be sold as object generators to be built into your unique test setup, or as a part of a Meridian system.

	Sold Individually	Starfield	FLEX	Sunfield	Brightfield
<b>Static Target Projectors (STPs)</b> <i>Image Quality</i>	X	X	X		
<b>Focusing Target Projectors (FTPs)</b> <i>Image Quality</i>	X	X	X		
<b>Sol Projectors</b> <i>Glare Spread Function/ Image Flare</i>	X		X	X	
<b>Light Trap Objects</b> <i>Veiling Glare Index</i>					X
